Career History

Visual Designer
HP | February 2022 - Present

- My main focus is creating responsive displays and component spec sheets that outline the typography, iconography, grid and spacing for components used to design a soon to be launched application. Under the supervision of the native solutions UX manager, I Implement standardized HP design system components and assets into local design libraries and files. I also maintain design styles which include color, spacing and typography in accordance with the standardized design system within local libraries and files.

Media and Tech Lead
Aim High PDX | February 2021 - February 2022

- Design, develop and maintain the 5 websites that Aim High PDX owns for each of its main departments. With direct guidance from the executive director, I am able to make design decisions that impact the amount of traffic and viewership of each website, including custom graphics that I and others create. My other responsibilities include creating graphics for flyers and managing tech equipment such as laptops, tablets and computers.

Freelance Web / UX designer
Self-employed | Sept 2017 - Present

- I work with small businesses to prototype, build and deploy web environments such as websites, landing pages, logo designs and online advertisements

Web Designer/Tech Specialist
Aim High PDX | March 2018 - February 2021

- Part-time work for a non-profit organization's behavior clinic department. The clinic needed help with providing clients with resources for Autism, and so I was in charge of redesigning and adding content for the clinic's website

Academic Background

UX Design Certification **In Progress*
Google | 2022 - In Progress

Certified in responsive web design
FreeCodeCamp | 2017- 2018
